

CIE QUESTION PAPER

UG

Global Academy of Technology, Bengaluru

Internal Test No: 1st IA

Date	0	5	0	3	2	5	Semester	4 th	U	S	N								
Subject Name	UX/UI								Subject Code	I	S	E	2	3	4	0	7	C	

Time: 45 Mins.**Max. Marks: 50****Note:** 1. Answer all the fifty questions, each question carries one mark.

2. For each question write one option and answer among four options. Ex: b) Answer.

3. writing more than one option/answer for the same question makes the answer invalid.

4. Damaging/overwriting, using whiteners on the sheet is strictly prohibited.

- What enables users to communicate needs to the system and receive processing results?
 - Operating System
 - User Interface
 - Hardware
 - Network Connection
- Which interface is considered best?
 - Complex and Feature-rich
 - Simple and Minimal
 - Effective Input and Output Mechanisms
 - Visually Stunning
- What does a well-designed interface provide to the system's capabilities?
 - Advanced Settings
 - A Window
 - Error Messages
 - Network Management
- What can result from a confusing interface?
 - User Satisfaction
 - Improved Performance
 - Difficulty and Mistakes
 - Reduced Training Costs
- What can poor UI design lead to?
 - User Engagement
 - Aggravation and Frustration
 - High Morale
 - Better Service
- What does resolving UI problems during development lead to?
 - Reduced Marketing Expenses
 - Increased Sales
 - Economic Benefits
 - Improved PR
- How does good UI design affect training costs?
 - Increased Costs
 - Lowered Costs
 - Same Costs
 - Unpredictable Costs
- What is the primary interaction mechanism in a GUI?
 - Keyboard
 - Pointing Device
 - Voice Commands
 - Text Input
- In a GUI, what do users interact with?

- a) Functions
 - b) Objects
 - c) Processes
 - d) Variables
10. What are the operations performed on objects in a GUI called?
- a) Algorithms
 - b) Actions
 - c) Protocols
 - d) Subroutines
11. What is a key characteristic of objects in a graphical interface?
- a) Hidden
 - b) Always Visible
 - c) Accessible Through Code
 - d) Constantly Changing
12. What actions can users perform on objects?
- a) Viewing Only
 - b) Accessing and Modifying
 - c) Deleting Only
 - d) Creating Only
13. What was the result of less crowded screens?
- a) Increased Time and Errors
 - b) Decreased Time and Fewer Errors
 - c) No Change
 - d) User Preference for Original
14. What was the reduction in decision-making time with good screen design?
- a) 10 percent
 - b) 20 percent
 - c) 40 percent
 - d) 60 percent
15. What is a benefit of good design for customers?
- a) Higher Prices
 - b) Improved Service
 - c) Reduced Quality
 - d) Less Personal Attention
16. What impact does good screen design have on employee satisfaction?
- a) Decreased Satisfaction
 - b) Increased Frustration
 - c) Increased Satisfaction
 - d) No Impact
17. How does good UI design affect support line costs?
- a) Increased Costs
 - b) Lowered Costs
 - c) Same Costs
 - d) Unpredictable Costs
18. How do graphics enhance the user interface?
- a) One-Dimensional Look
 - b) Three-Dimensional Look
 - c) Reduced Computer Power
 - d) Slowed User Actions
19. What is a key advantage of using graphics?
- a) Increased Mental Load
 - b) Reduced Information Transfer
 - c) Reduced Mental Load and Increased Transfer
 - d) Limited Visual Comparisons
20. What is direct manipulation in graphical systems?
- a) Complex Commands
 - b) Extension of the Real World
 - c) Hiding Objects
 - d) Difficult to Reverse Actions
21. What did Nelson (1980) call "virtual reality"?
- a) Complex Interface
 - b) Manipulatable Representation of Reality
 - c) Text-Based System
 - d) Abstract Data Model

22. What does "WYSIWYG" stand for?
- a) What you see is what you get
 - b) What you select is what you grab
 - c) What you save is what you get
 - d) What you send is what you get
23. How are the results of actions displayed in direct manipulation?
- a) Code Outputs
 - b) Visually on the Screen
 - c) Auditory Feedback
 - d) After a Delay
24. What is a key benefit of incremental actions in direct manipulation?
- a) Difficult to Reverse
 - b) Requires Technical Skills
 - c) Continuous and Effortless
 - d) Hidden
25. What happens if an action is incorrect in direct manipulation?
- a) System Crashes
 - b) Easily Undone
 - c) Restart Process
 - d) Irreversible
26. What is the term for substituting words for symbols?
- a) Direct Manipulation
 - b) Indirect Manipulation
 - c) Virtual Reality
 - d) Transparency
27. Which is NOT a reason to use Indirect Manipulation?
- a) Difficult to Conceptualize
 - b) Difficult to Learn
 - c) Easier to Perform Using Symbols
 - d) Limited Space
28. What is the user interface design a subset of?
- a) Software Engineering
 - b) Human-Computer Interaction
 - c) Computer Graphics
 - d) Artificial Intelligence
29. What are the components of a user interface?
- a) Hardware and Software
 - b) Input and Output
 - c) Design and Functionality
 - d) Text and Graphics
30. What is the goal of human-computer interaction?
- a) Visually Appealing Interfaces
 - b) Effective Collaboration
 - c) Maximize Processing Speed
 - d) Minimize Development Cost
31. According to Gould, what is a general observation about design?
- a) Predictable Development
 - b) Nobody Gets It Right Initially
 - c) Unnecessary Change
 - d) Eliminating User Mistakes
32. According to Gould, what do Designers need?
- a) Unlimited Resources
 - b) Good Tools
 - c) To ignore user feedback
 - d) To avoid change
33. What is a common pitfall in UI design?
- a) Early Analysis
 - b) Prototyping
 - c) No Usability Testing
 - d) Clear Vision
34. A focus on "glitzy" design can lack:

- | | |
|------------------|-----------------------------|
| a) Visual Appeal | c) Technical Sophistication |
| b) User Focus | d) Cost-Effectiveness |

35. What results from poor communication?

- | | |
|-----------------------|----------------------------|
| a) Design Consistency | c) Inefficient Feedback |
| b) Design Shortcuts | d) Ineffective Integration |

36. What is the primary focus when understanding users?

- | | |
|-----------------------------|-------------------|
| a) Developer Preferences | c) People's Needs |
| b) Technological Innovation | d) Market Trends |

37. Why is user involvement important?

- | | |
|-------------------|------------------------|
| a) Reduce Costs | c) Understand Needs |
| b) Limit Features | d) Increase Complexity |

38. What is the goal of rapid prototyping?

- | | |
|-----------------------|--------------------|
| a) Delay Release | c) Increase Costs |
| b) Identify Solutions | d) Ignore Feedback |

39. Why is it harder to fix after release?

- | | |
|------------------------------|---------------------|
| a) Forgiving Users | c) Finalized Design |
| b) Easier Code Change Before | d) Thorough Testing |

40. What does integrating system components ensure?

- | | |
|---------------------------|----------------------|
| a) Independent Components | c) Software Priority |
| b) Cohesive Elements | d) Ignored Training |

41. How is "usability" defined?

- | | |
|---------------------------|---------------------|
| a) Visual Appeal | c) Complexity |
| b) Ease and Effectiveness | d) Development Cost |

42. What is the focus of subjective assessment in usability?

- | | |
|--------------------------|----------------------|
| a) Technical Performance | c) Development Costs |
| b) User Comfort | d) Market Demand |

43. Mandel describes usability problems as:

- | | |
|-----------------|-----------------------|
| a) System Speed | c) Difficult Menus |
| b) User Fatigue | d) Number of Features |

44. What is a sign of usability problems in graphical systems?

- | | |
|----------------------|--------------------|
| a) User Satisfaction | c) Ambiguous Menus |
| b) Clear Menus | d) Efficient Input |

45. What is the effect of inadequate feedback?

- | | |
|---------------------------|-------------------------|
| a) Increased Satisfaction | c) Decreased Trust |
| b) Faster Completion | d) Improved Performance |

46. What does effectiveness refer to?

- a) Development Cost
- b) Speed and Accuracy

- c) Visual Appeal
- d) Number of Features

47. What does learnability refer to?

- a) Processing Speed
- b) Time and Training

- c) Cost-Effectiveness
- d) Support Staff

48. What does flexibility refer to?

- a) Number of Features
- b) Adaptability

- c) Security Measures
- d) Ease of Upgrading

49. How are user attitudes measured

- a) Performance Metrics
- b) Tiredness, Discomfort

- c) Cost Analysis
- d) Support Calls

50. Which criterion reflects user satisfaction?

- a) Minimal Support
- b) High Performance

- c) Enhanced Usage
- d) Low Error Rate
