

CIE QUESTION PAPER

UG

Global Academy of Technology, Bengaluru

Internal Test No: 1st IA

Date	0	6	0	3	2	5	Semester	4 th	U S N													
Subject Name			UX/UI						Subject Code		I	S	E	2	3	4	0	7	C			

Time: 75 Mins.**Max. Marks: 50**

Note: 1. Answer all the fifty questions, each question carries one mark.

2. For each question write one option and answer among four options. Ex: b) Answer.

3. writing more than one option/answer for the same question makes the answer invalid.

4. Damaging/overwriting, using whiteners on the sheet is strictly prohibited.

1. What is the term for substituting words for symbols?
 - a) Direct Manipulation
 - b) Indirect Manipulation
 - c) Virtual Reality
 - d) Transparency
2. Which is NOT a reason to use Indirect Manipulation?
 - a) Difficult to Conceptualize
 - b) Difficult to Learn
 - c) Easier to Perform Using Symbols
 - d) Limited Space
3. What is the user interface design a subset of?
 - a) Software Engineering
 - b) Human-Computer Interaction
 - c) Computer Graphics
 - d) Artificial Intelligence
4. What are the components of a user interface?
 - a) Hardware and Software
 - b) Input and Output
 - c) Design and Functionality
 - d) Text and Graphics
5. What is the goal of human-computer interaction?
 - a) Visually Appealing Interfaces
 - b) Effective Collaboration
 - c) Maximize Processing Speed
 - d) Minimize Development Cost
6. According to Gould, what is a general observation about design?
 - a) Predictable Development
 - b) Nobody Gets It Right Initially
 - c) Unnecessary Change
 - d) Eliminating User Mistakes
7. According to Gould, what do Designers need?
 - a) Unlimited Resources
 - b) Good Tools
 - c) To ignore user feedback
 - d) To avoid change
8. What is a common pitfall in UI design?
 - a) Early Analysis
 - b) Prototyping
 - c) No Usability Testing
 - d) Clear Vision

9. A focus on "glitzy" design can lack:
- a) Visual Appeal
 - b) User Focus
 - c) Technical Sophistication
 - d) Cost-Effectiveness
10. What results from poor communication?
- a) Design Consistency
 - b) Design Shortcuts
 - c) Inefficient Feedback
 - d) Ineffective Integration
11. What is the primary focus when understanding users?
- a) Developer Preferences
 - b) Technological Innovation
 - c) People's Needs
 - d) Market Trends
12. Why is user involvement important?
- a) Reduce Costs
 - b) Limit Features
 - c) Understand Needs
 - d) Increase Complexity
13. What is the goal of rapid prototyping?
- a) Delay Release
 - b) Identify Solutions
 - c) Increase Costs
 - d) Ignore Feedback
14. Why is it harder to fix after release?
- a) Forgiving Users
 - b) Easier Code Change Before
 - c) Finalized Design
 - d) Thorough Testing
15. What does integrating system components ensure?
- a) Independent Components
 - b) Cohesive Elements
 - c) Software Priority
 - d) Ignored Training
16. How is "usability" defined?
- a) Visual Appeal
 - b) Ease and Effectiveness
 - c) Complexity
 - d) Development Cost
17. What is the focus of subjective assessment in usability?
- a) Technical Performance
 - b) User Comfort
 - c) Development Costs
 - d) Market Demand
18. Mandel describes usability problems as:
- a) System Speed
 - b) User Fatigue
 - c) Difficult Menus
 - d) Number of Features
19. What is a sign of usability problems in graphical systems?
- a) User Satisfaction
 - b) Clear Menus
 - c) Ambiguous Menus
 - d) Efficient Input
20. What is the effect of inadequate feedback?
- a) Increased Satisfaction
 - b) Faster Completion
 - c) Decreased Trust
 - d) Improved Performance

21. What does effectiveness refer to?
a) Development Cost
b) Speed and Accuracy
c) Visual Appeal
d) Number of Features
22. What does learnability refer to?
a) Processing Speed
b) Time and Training
c) Cost-Effectiveness
d) Support Staff
23. What does flexibility refer to?
a) Number of Features
b) Adaptability
c) Security Measures
d) Ease of Upgrading
24. How are user attitudes measured
a) Performance Metrics
b) Tiredness, Discomfort
c) Cost Analysis
d) Support Calls
25. Which criterion reflects user satisfaction?
a) Minimal Support
b) High Performance
c) Enhanced Usage
d) Low Error Rate
26. What enables users to communicate needs to the system and receive processing results?
a) Operating System
b) User Interface
c) Hardware
d) Network Connection
27. Which interface is considered best?
a) Complex and Feature-rich
b) Simple and Minimal
c) Effective Input and Output Mechanisms
d) Visually Stunning
28. What does a well-designed interface provide to the system's capabilities?
a) Advanced Settings
b) A Window
c) Error Messages
d) Network Management
29. What can result from a confusing interface?
a) User Satisfaction
b) Improved Performance
c) Difficulty and Mistakes
d) Reduced Training Costs
30. What can poor UI design lead to?
a) User Engagement
b) Aggravation and Frustration
c) High Morale
d) Better Service
31. What does resolving UI problems during development lead to?
a) Reduced Marketing Expenses
b) Increased Sales
c) Economic Benefits
d) Improved PR
32. How does good UI design affect training costs?
a) Increased Costs
b) Lowered Costs
c) Same Costs
d) Unpredictable Costs
33. What is the primary interaction mechanism in a GUI?
a) Keyboard
b) Pointing Device
c) Voice Commands
d) Text Input

34. In a GUI, what do users interact with?
 - a) Functions
 - b) Objects
 - c) Processes
 - d) Variables
35. What are the operations performed on objects in a GUI called?
 - a) Algorithms
 - b) Actions
 - c) Protocols
 - d) Subroutines
36. What is a key characteristic of objects in a graphical interface?
 - a) Hidden
 - b) Always Visible
 - c) Accessible Through Code
 - d) Constantly Changing
37. What actions can users perform on objects?
 - a) Viewing Only
 - b) Accessing and Modifying
 - c) Deleting Only
 - d) Creating Only
38. What was the result of less crowded screens?
 - a) Increased Time and Errors
 - b) Decreased Time and Fewer Errors
 - c) No Change
 - d) User Preference for Original
39. What was the reduction in decision-making time with good screen design?
 - a) 10 percent
 - b) 20 percent
 - c) 40 percent
 - d) 60 percent
40. What is a benefit of good design for customers?
 - a) Higher Prices
 - b) Improved Service
 - c) Reduced Quality
 - d) Less Personal Attention
41. What impact does good screen design have on employee satisfaction?
 - a) Decreased Satisfaction
 - b) Increased Frustration
 - c) Increased Satisfaction
 - d) No Impact
42. How does good UI design affect support line costs?
 - a) Increased Costs
 - b) Lowered Costs
 - c) Same Costs
 - d) Unpredictable Costs
43. How do graphics enhance the user interface?
 - a) One-Dimensional Look
 - b) Three-Dimensional Look
 - c) Reduced Computer Power
 - d) Slowed User Actions
44. What is a key advantage of using graphics?
 - a) Increased Mental Load
 - b) Reduced Information Transfer
 - c) Reduced Mental Load and Increased Transfer
 - d) Limited Visual Comparisons
45. What is direct manipulation in graphical systems?
 - a) Complex Commands
 - b) Extension of the Real World
 - c) Hiding Objects
 - d) Difficult to Reverse Actions

46. What did Nelson (1980) call "virtual reality"?
- a) Complex Interface
 - b) Manipulatable Representation of Reality
 - c) Text-Based System
 - d) Abstract Data Model
47. What does "WYSIWYG" stand for?
- a) What you see is what you get
 - b) What you select is what you grab
 - c) What you save is what you get
 - d) What you send is what you get
48. How are the results of actions displayed in direct manipulation?
- a) Code Outputs
 - b) Visually on the Screen
 - c) Auditory Feedback
 - d) After a Delay
49. What is a key benefit of incremental actions in direct manipulation?
- a) Difficult to Reverse
 - b) Requires Technical Skills
 - c) Continuous and Effortless
 - d) Hidden
50. What happens if an action is incorrect in direct manipulation?
- a) System Crashes
 - b) Easily Undone
 - c) Restart Process
 - d) Irreversible
